DETAILED ACTION

1. Response filed on 12/11/03 has been received.

Claim Rejections - 35 USC § 103

2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

3. Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Thomas (WO 98/12089) in view of Voss (DE 4219101 A1).

Thomas discloses:

See figure 4, valve 32, dryer 34, reservoir 50

Thomas does not disclose purging the air dryer when the engine is stopped. Voss teaches purging the air dryer when the engine is stopped (see attached partial translation and Derwent abstracts). It would have been obvious to one of ordinary skill in the art at the time the invention was made to purge the air dryer as taught by Voss in the system of Thomas in order to ensure proper operation on start up of the vehicle.

Response to Arguments

4. Applicant's arguments filed 12/11/03 have been fully considered but they are not persuasive. Applicants argue that Thomas nor Voss teaches purging the control valve. This is incorrect. Thomas has the same structure as the instant invention and would purge moisture in the same way. When the air dryer is purged, air is exhausted through the control valve 32 thus also purging it.

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
